RANCHO PALOS VERDES

TO: CAROLYN LEHR, CITY MANAGER
FROM: RAY HOLLAND, DIRECTOR OF PUBLIC WORKS 
DATE: DECEMBER 15, 2010
SUBJECT: WEEKLY ADMINISTRATIVE REPORT

UPDATE ON RESIDENTIAL ROADWAY REHAB PROJECT

Pavement resurfacing work has continued in the Island View and Sea Crest neighborhoods off of Crest Road. In order to improve the quality of the product applied, an additional coat of slurry seal was laid last Friday and Monday on Santa Catalina, Santa Barbara, Ocean Terrace, and Pacifica. **The quality of the slurry seal is a major improvement and enhancement to the final roadway surface.**

The remaining slurry seal that was scheduled for Tuesday on San Clemente, Ocean Port, and remaining portions of Ocean Terrace and Santa Barbara was cancelled due to the thick fog and wet conditions. The repair work will resume once more favorable weather conditions return. It is anticipated that the contractor will resume this repair work after the beginning of the New Year. Staff is very appreciative of the continued patience and cooperation received by the residents in these areas.

CREST ROAD/CRENSHAW BLVD ASPHALT WALKING PATH REHAB PROJECT

Work has continued over the past few weeks removing tree roots, placing root barriers in areas where the tree roots have displaced portions of the walkway, replacing adjacent sections of asphalt, and crack sealing. On Tuesday, the application of the sealant coat began, but the foggy and wet conditions have slowed the progress. Work is expected to continue through the next couple of weeks, dependent upon the weather conditions encountered.

FIRST PHASE OF CATCH BASIN SCREENS INSTALLED

Contractors have finished installing full capture pipe screens in 24 of the City's catch basins that drain to Machado Lake. The intent of this Water Quality and Flood Protection Program funded project is to install screens that capture all trash and debris (greater than 5mm in diameter) in the catch basin before it enters the drainage system and is transported to the receiving water body. Installation of the screens is in response to rules set forth in a Total Maximum Daily Load (TMDL) allocation for the lake promulgated by the Los Angeles Regional Water Quality Board. These 24 installations represent the first phase of a five year plan to retrofit all 107 catch basins that drain to Machado Lake. Staff anticipates being able to accelerate the installation program due to current favorable pricing. The Regional Board is considering similar rules for other waterbodies to which the City contributes storm water, meaning many more of the City's catch basins may require screen retrofits in the future.
