**RE: STORM DRAIN DEFICIENCY IMPROVEMENT PROJECT  
NOTICE OF CONSTRUCTION AND STAGING AREA ACTIVITY**

Dear Resident,

The City of Rancho Palos Verdes (City) would like to inform you that storm drain construction will commence on adjacent and surrounding streets in your neighborhood in mid-September. Storm drain repairs are part of the Master Plan of Drainage, an assessment of the City's storm drain network which identifies deficiencies and the areas with the most need for improvement. This project is the first recommended group of storm drains in a cycle of ten. These upgrades will improve integrity and increase capacity which will allow the new, stronger pipe to transport more storm water away from your streets during a rain event.

On June 6, 2017, the City Council awarded a construction contract to Colich & Sons for the construction of storm drain deficiency improvements at various locations throughout the City. Colich's work will last approximately 6 months and includes: potholing, trenching, storm drain replacement, catch basin upgrades, and road rehabilitation. Work may or may not occur in front of your home, however, you are being notified because you reside in the construction area. Please refer to the attached exhibit for the proposed work location and pipe size. The contractor will leave door hangers to notify you if your driveway access will be restricted.

The storm drains along Ironwood Street and within Grandview Park are scheduled to receive an upgrade as part of this project. A small area within the park will be utilized temporarily to store construction-related material and vehicles to minimize street congestion. The contractor is required to maintain access to the park at all times and will restore the staging area to a condition better than when they mobilized. Trail access through the end of Ironwood Street will be maintained throughout the duration of the project.

You can expect to see markings in the street to identify the location of underground utilities. These will remain on the street or sidewalk for the duration of the project but will be removed and restored to original conditions once the work is complete. We appreciate your patience and cooperation during this phase of construction. It is our goal to complete the work as timely as possible.

Please place your trashcans on trash day, curb side, at 7:00 AM so EDCO can perform early pick up on your regularly scheduled trash day. Early trash pickup will depend on the construction activities occurring in front of your residence and may or may not happen.

You may access the City project webpage for more information:  
<http://www.rpvca.gov/1062/Storm-Drain-Improvements-Project-SDDIP>.

The City's goal is to complete this project with the least amount of impacts to our residents. For questions regarding construction and scheduling, please feel free to contact me at (310) 935-5544.

Respectfully,

John Collins,  
Community Outreach Coordinator and City Inspector
