

## Lower Point Vicente and Ocean Front Estates – Bluff Top Erosion Control Project

On Monday, February 11, 2013, the City will begin construction along the bluff top trail to mitigate erosion issues. The Project includes installation of new drainage lines, Geotextile fabric, and gabion baskets seaward of the existing bluff top fence. The proposed scope of work has been coordinated with the Palos Verdes Peninsula Land Conservancy (PVPLC) to minimize impacts to the surrounding environment.

The public trails will primarily remain open during construction with intermittent closures intended to minimize inconveniences to trail users.

Inquiries should be directed to Bindu Vaish, Public Works Department Associate Engineer, at 310-544-5252, or e-mail [binduv@rpv.com](mailto:binduv@rpv.com).
