FELV (Non-Adjuvant) (*Feline Leukemia*) (Minimum Age: 8 weeks & older) **\$21**

♥ Ideally, pets should receive one of their sets of initial vaccines between the age of 14-16 weeks to achieve the best immunity against disease. During your pet's initial vaccine series, do not wait longer than 6 weeks apart to have your pet vaccinated. All pets adopted from shelters should receive vaccine boosters 1 month after adoption. ♥
