CITY MANAGER

- **Southern California Edison Circuit Reliability Review:** On February 13th, Staff received the attached report on circuit reliability during 2016 from Southern California Edison (SCE). The table below summarizes a comparison of the frequency and duration of momentary and sustained outages in 2015 and 2016.

2016	Momentary (≤ 5 min.)	Sustained (> 5 min.)	
	Frequency	Frequency	Duration
Rancho Palos Verdes	1.60/circuit	2.00/circuit	342.90 min.
South Bay District	N/A	1.88/circuit	183.90 min.
SCE System-wide	1.70/circuit	1.10/circuit	134.50 min.
2015	Momentary (≤ 5 min.)	Sustained (> 5 min.)	
	Frequency	Frequency	Duration
Rancho Palos Verdes	1.40/circuit	1.10/circuit	154.30 min.
South Bay District	N/A	1.31/circuit	164.07 min.
SCE System-wide	1.00/circuit	0.90/circuit	114.80 min.

For circuits in Rancho Palos Verdes, comparing 2016 to 2015, the frequency of momentary outages increased 114.3%, the frequency of sustained outages increased 181.8% and the duration of sustained outages increased 222.2%. Staff suspects that this spike in SCE circuit outages may be related to the on-going SCE System Upgrade project, which required a large number of scheduled outages during 2016. Staff intends to consult with SCE to identify the issues related to last year's outages and to gauge the expected performance of the system for 2017.

- **Update on Ladera Linda Fields:** On February 13th and 15th, the Department of Toxic Substances Control (DTSC) posted additional documents on its EnvironStor site. These included responses to the Communication and Coordination Plan (CCP) and the Preliminary Endangerment Assessment (PEA) Work Plan (see attachments), which had been submitted to DTSC on December 29th by the Palos Verdes Peninsula Unified School District (PVPUSD) and the Palos Verdes American Youth Soccer Organization (AYSO). In its responses, DTSC characterized these documents as inconsistent with the Consent Agreement between DTSC, PVPUSD and AYSO, and "severely deficient." DTSC has asked PVPUSD and AYSO to submit a corrected CCP by February 24th and a corrected PEA Work Plan by March 10th.

DTSC comments on Communication and Coordination Plan

DTSC comments on Preliminary Endangerment Assessment Work Plan

- **Palos Verdes Reef Restoration Project Open House:** From the late 1940s until the early 1970s, Los Angeles-area industries (most notably Montrose Chemicals in Torrance) discharged tons of DDT and PCBs into the ocean waters off the Palos Verdes Peninsula. In October 2000, the Federal and State governments and the remaining defendants settled the so-called Montrose case. The Trustees for the Montrose Settlements Restoration Program (MSRP) received tens of millions of dollars to reimburse past damage assessment

costs and to implement the actions necessary to restore the natural resources and their services that were injured by the DDT and PCBs. Additional information about the MSRP is available on-line by clicking [here](#).

In November 2011, a public meeting was held at the Point Vicente Interpretive Center (PVIC) to present the MSRP Trustees' proposal for the second and final phase of MSRP restoration efforts. The Phase 2 Restoration Plan (P2RP) included two (2) fish habitat restoration projects with the potential for direct effects upon segments of the City's coastline: Kelp Forest Restoration and Subtidal Reef Restoration. The Kelp Forest Restoration project commenced in late 2012, and has been very successful in restoring kelp forests along the Peninsula coastline between the Palos Verdes Estates city limit and Abalone Cove.

The MSRP Trustees are now ready to proceed with the Subtidal Reef Restoration project, which involves restoring subtidal rocky reefs along the southerly shoreline of the Peninsula that have been degraded by sedimentation. On February 21st, Staff was notified that the MSRP Trustees would be holding another public meeting at PVIC on Thursday, March 2nd to present the Palos Verdes Reef Restoration Project for public review and comment (see attached email). As currently envisioned, the project would involve the placement of 70,300 tons of quarry rock on 40 acres of sandy ocean bottom within a 69-acre site located 0.3 miles offshore of Trump National Golf Course. The Environmental Assessment for this project may be reviewed by clicking [here](#).

Public comments on the project are due by March 22nd. Additional information is available from Gabrielle Dorr, MSRP Outreach and Education Coordinator, at (562) 980-3236 or gabrielle.dorr@noaa.gov.

- New County Agency Members on Nextdoor: As the City Council is aware, the City has had an agency account on Nextdoor for some time now. The City's Nextdoor account currently reaches nearly 6,300 residents, which equates to roughly 24% of households. Recently, Staff has learned that two County agencies have also joined Nextdoor: the Lomita Sheriff's Station and the County of Los Angeles. These new County accounts will allow these agencies to communicate directly with the City's residents via Nextdoor.

Attachment

Email from MSRP

Peninsula Regional Law Enforcement Crime Statistics: Attached are pertinent excerpts from the statistics presented at the Peninsula Regional Law Enforcement Committee meeting held on February 9th 2016. The data is for the fourth quarter of 2016 (October through December) and includes Part 1 Crimes (violent), Part 2 Crimes (non-violent), traffic enforcement statistics, Sheriff's response time, and ambulance response time performance.

Additionally, Captain Beringer reported on the success of the ALPR cameras installed throughout the Peninsula Region and noted that since the cameras were operational as of August 25 2016, 25 stolen vehicles were recovered, 31 arrests were made, 3 warrant arrests made, 2 individuals were contacted that were listed as missing persons and a vehicle was turned over to the Los Angeles Police Department.

FINANCE

2017 Business License Renewals: The busy season for business licenses has started! As of February 21, Staff processed \$487,619 or 61% of the total annual budgeted revenue amount of \$794,500. Staff expects business license renewals will increase throughout the fiscal year. Though the January 31st deadline to renew a business license without a penalty has passed, Business owners still have the option to renew online at <http://rpvpay.com/businesslicense/>, by mail, or in person at City Hall.

PUBLIC WORKS

- The Maintenance Department began preparing for the Winter Storm Lucifer on February the 15, 2017. Storm prep included:
 - Filling and dispersing 500+ sandbags
 - Cleaning of catch basin inlets
 - Sand bagging of problem stormwater outlets
 - Repair of a 12" x 150' drain line in Sacred Cove
 - Prepositioning cones and barricades at potential trouble spots for traffic control
 - Clearing of debris from the San Ramon drainage structure
 - Loading a quick response trailer with sandbags, signs and barricades
- The Maintenance Department responded to 37 calls for service during the storm event on February 17, 2017, from 7:30 A.M. to 10:00 P.M., to include:
 - 27 reports of downed trees or limbs
 - 3 downed signs
 - 3 reports of leaks in City buildings
 - 4 work orders for other storm related issues
- The Maintenance Department was augmented by Engineering and Admin staff throughout the event, and also received assistance from contracted Public Works Inspectors, Building Inspectors and Contractors from Stay Green Inc., West Coast Arborist and Hardy & Harper. Post storm debris removal activities continued on Saturday.
- Additional reports of downed trees, limbs and signs were received on Monday, these included:
 - 4 downed trees or limbs
 - 3 downed signs

Cleanup activities will continue throughout this week.

- Traffic Safety Committee: On Monday, February 27, 2017 the TSC will host its second and final public workshop to discuss traffic issues on Palos Verdes Drive East and Miraleste Drive near Miraleste Intermediate School. The meeting will be held at Miraleste Intermediate School in the Theater Arts Building at 7:00pm.

COMMUNITY DEVELOPMENT

- Former Coco's Restaurant Property Maintenance: Late last week, City Staff received new property maintenance complaints and reports that vagrants were occupying the interior and loitering around the former Coco's Restaurant at 28300 Western Avenue. The LA County Sherriff's Department responded and arrested the individuals. Staff has contacted the owner of the property regarding the vagrant problem, as well as the property maintenance

issues. The property owner has indicated their maintenance crews will be at the site this week to begin cleaning and re-securing the property.

- Storm-Related Erosion Damage at 21 Martingale: The recent rainstorms have caused erosion damage on to the rear slope at 21 Martingale that had previous storm related slide damage a few years ago (see attached photos). The current erosion damage has undermined the landing of an exterior stairway and exposed a substantial portion of the footing of a retaining wall adjacent to the rear of the house. As a result of this condition, the property was posted with a “yellow tag” to restrict access to the exterior stair landing and the area above the retaining wall. Also on the same slope at the rear of this property, a mudslide occurred which significantly damaged a section of the Martingale Trail that traverses the subject property. In response to the City contacting the property owner, plastic sheeting was placed on the slide area adjacent to the retaining wall to minimize further erosion. Staff is also requiring that the property owner install erosion control measures around the trail damaged area.
- Salvation Army Conditional Use Permit Revision Update: Earlier this year, the Salvation Army submitted an application to amend its Conditional Use Permit to allow the construction of nine (9) new campus residences. On February 15, 2017, a letter (attached) was submitted to the City from the Salvation Army requesting to put the project in abeyance for six (6) months. Staff has contacted the environmental firms who have submitted proposals to prepare the project’s environmental document that their proposals will not be considered by the City Council at this time because of the applicant’s abeyance request. If and when the project is resumed, these firms may be asked to resubmit an updated proposal for the City Council’s consideration at a future meeting.
- Trump National Golf Club Status Report: As a Condition of Approval for the Grading Permit for the golf course, the Trump National organization is required to submit a report on the status of the driving range and Vesting Tentative Tract Map No. 50666 to the City, every 6 months from the date of the extension. As the City Council approved an extension in August 2016, a 6-month report is due in February 2017. Accordingly, the Trump National organization submitted the attached letter describing their efforts and progress in obtaining the Coastal approval for Tract 50666 and all other remaining items to be completed prior to submitting the Final Map for Tract 50666 for City’s review. In short, the Trump National organization is prepared to submit the Final Map, if the City agrees to accept it for processing. This is because since 2013, the City informed the Trump National organization that until the violation of the unpermitted hedge along the westerly border of the property is resolved, the City could not accept any further requests for entitlements pursuant to Section 17.86.050 of the RPVMC.
- Planning Commission Agenda: Attached is the draft agenda for the Planning Commission meeting on Tuesday, February 28, 2017.
- Applications of Note: See attached table with a summary of the Applications of Note that were submitted to the department between Wednesday, February 15, 2017 and Tuesday, February 21, 2017.

RECREATION & PARKS

- Story Time Programs: *Flutterby Storytime* will be held Friday morning at Ladera Linda Park from 11 am to noon. This free program for parents and children ages 2 to 5 years old is led by Recreation staff and features music, stories and a craft.

Little Fish Tales by the Sea was held on February 16th. Over 30 children participated in the program which featured a caterpillar craft.

- Healthy RPV Program: On Tuesday morning, a free yoga class was held at Ryan Park outside on the grass lawn.
- Volunteer Program: On Sunday, 42 volunteers planted 45 plants (Seacliff buckwheat, California poppy, and Arroyo lupine), seeded the garden, weeded, pruned back plants, and patched up the pathway. They were a great group of mostly students from PV and Peninsula High. This event is organized by Megan Roy with the local Native Plant Society chapter and is held the third Sunday of each month from 10 a.m. – noon.

- REACH Therapeutic Recreation Program: On Monday evening, REACH members will enjoy a Mardi Gras themed dinner, followed by Mardi Gras fun and games.

ADMINISTRATIVE REPORT

February 22, 2017

Page 10

- Hesse Park: The facilities are rented this week for eleven indoor recreation classes, seven non-profit meetings, two Peninsula Seniors activities, and two private rentals.
- Ladera Linda Park: The facilities are rented this week for eight indoor recreation classes.
- PVIC and Docents: One docent-led museum tour will be held this week. The Sunset room will be rented on Thursday evening for a local non-profit meeting. The junior docent training program will meet on Saturday morning.
- Ryan Park: The facilities are rented this week for three outdoor recreation classes and five youth sports league field rentals.

Circuit Reliability Review

Rancho Palos Verdes

58

January 2017

Providing Safe, Reliable, and Affordable Power

Southern California Edison is modernizing the power grid to meet the changing needs and expectations of our customers and to help California achieve its clean energy goals.

We are investing more than \$12 billion into our power grid between 2015 – 2017 with the goal of increasing power reliability through significant upgrades. These investments include:

- Updating thousands of transmission and distribution poles
- Replacing hundreds of miles of underground cables
- Replacing hundreds of underground structures such as vaults and manholes
- Upgrading critical distribution equipment; capacitor banks, switches, and circuit breakers
- Building new distribution circuits to serve electrical demands in our communities
- Inspecting and replacing overhead conductor and equipment to improve public safety

Our investments in local communities will help ensure that customers receive safe, reliable, and affordable electricity now and in the future.

Understanding Your Reliability Report

As your electric utility, we want you to always have power when you need it. To get there, we constantly track and monitor electric outages across our service territory, and we measure our “system reliability” from this data.

The two metrics we rely on are common in the electric utility industry: the System Average Interruption Duration Index (SAIDI) and the System Average Interruption Frequency Index (SAIFI). Both are described in more detail on the next page.

Replacing and upgrading our infrastructure will help SCE maintain or improve SAIDI and SAIFI measurements.

This report provides historical reliability data for the circuits that serve your jurisdiction and our proposed infrastructure upgrades for the current year.

To view other reliability reports, visit [sce.com>Outage Center>Maintaining Reliable Service](https://sce.com/outage-center/maintaining-reliable-service)

Reliability Metrics

MOMENTARY OUTAGES:

OUTAGES LASTING 5 MINUTES OR LESS

MAIFI:

- The number of times the average customer is interrupted by Momentary outages each year.

SUSTAINED OUTAGES:

OUTAGES LASTING LONGER THAN 5 MINUTES

SAIFI:

- The number of times the average customer is interrupted by Sustained outages each year.

SAIDI:

- The cumulative amount of time the average customer is interrupted by Sustained outages each year.

63

***Exclusions** are days which utilities are allowed to remove from their metrics because the outages on those days were caused by a severe acts of nature.

***In the columns showing "Rank," lower numbers indicate poorer performance.

Overview of Rancho Palos Verdes

There are 28 circuits that serve Rancho Palos Verdes

Circuit Type	Sum of Customers	Circuit Type	Sum of Customers	Circuit Type	Sum of Customers
AMBERSKY(16KV)	1,835

Reliability History of Circuits Serving Rancho Palos Verdes (No Exclusions)

Causes of Repair Outages in Rancho Palos Verdes Circuits 2016 YTD

Contributions to SAIDI by Outage Cause

SAIDI = the cumulative amount of time the average customer is interrupted by “sustained” outages each year.

Causes of Repair Outages in Rancho Palos Verdes

Circuits 2016 YTD

Contributions to SAIFI by Outage Cause

SAIFI = the number of times the average customer is interrupted by “sustained” outages each year.

Rancho Palos Verdes 2017 Capital Improvement Plan

- Replacement/Equipment Upgrade**
- Pole Replacement
 - Other Work**
 - Circuit Rebuild
 - Circuit Reliability Upgrade
 - Structures & Equipment
 - Underground Structure Replacement
- Replacement/Equipment Upgrade (Transmission)**
- Pole Replacement

Notes:

No outages are excluded from the metrics.

Outage Causes:

- Other: e.g., patrolled but no cause could be found
Operations: e.g., urgent maintenance w/o 3-day notice to customers
3rd Party: e.g., balloons, car hit pole, dig-in
Vegetation/Animal: e.g., tree branch, rodent, or bird causing short circuit across conductors

SAIDI (minutes) = the cumulative amount of time the average customer is interrupted by "sustained" (longer than 5 minutes) outages.

SAIFI(interruptions) = the number of times the average customer is interrupted by “sustained” outages.

MAIFI (interruptions) = the number of times the average customer is interrupted by "momentary" (lasting 5 minutes or less) outages.

REVIEW OF DRAFT COMMUNICATION AND COORDINATION PLAN,
LADERA LINDA SITE, STOCKPILED SOIL AREA LOCATED ADJACENT TO UPPER
LADERA FIELD, 32201 FORRESTAL DRIVE, RANCHO PALOS VERDES
(SITE CODE 401759-00)

Dear Mr. Miller,

The Department of Toxic Substances Control (DTSC) reviewed the Draft Preliminary Endangerment Assessment (PEA) Work Plan and associated Health and Safety Plan, prepared by Avocet Environmental, Inc., dated December 29, 2016. The documents describe investigation activities proposed for a stockpiled soil area located adjacent to and north of Upper Ladera Field at 32201 Forrestal Drive in Rancho Palos Verdes (Site).

Section 4.0 of the draft PEA Work Plan is titled, "Communication and Coordination Plan (CCP)," and was intended to satisfy the requirement for a Communication and Coordination Plan. The information included in Section 4.0 does not provide the information required for a CCP and does not comply with Section 6.1.1 of the Consent Agreement. As explained in that section, the CCP dictates how the parties will communicate and coordinate with one another ("Respondents shall submit to DTSC for approval a CCP that specifies the requirements and procedures by which Respondents will communicate and coordinate with one another in carrying out the requirements of this Agreement."). A well-designed CCP reduces implementation costs by streamlining communication. Without the CCP, DTSC is forced to communicate with various parties serially, which increases oversight costs.

DTSC has communicated the purpose and expected content of the CCP in multiple communications:

- November 2, 2016: DTSC communicated the purpose of the CCP to the Respondents during the initial scoping meeting.
- November 18, 2016: In its determination letter for additional investigation, DTSC formally requested submittal of a CCP, with reference to Section 6.1.1 of the Consent Agreement, by November 28, 2016.
- November 28, 2016: DTSC received a request for an extension to submit the CCP from legal counsel for Palos Verdes American Youth Soccer Organization (PV AYSO). PV AYSO requested an extension until December 30, 2016.
- December 2, 2016: DTSC approved the extension request, reiterated the purpose, and provided a list of information to include in the CCP.

Additionally, DTSC also requested identification of a Project Coordinator in accordance with Section 6.1. In response, Mr. Philip Miller, Avocet Environmental Inc., was designated as the Project Coordinator. In an email, dated November 30, 2016, DTSC acknowledged designation of Mr. Phil Miller as the Project Coordinator and attempted to centralize communication. However, communication from multiple parties from the Respondents continued.

In accordance with Section 6.1 of the Consent Agreement, the Project Coordinator's "responsibilities will be to receive all notices, comments, approvals, and other communications from DTSC. The Project Coordinator must have sufficient technical expertise to coordinate the Work and may not be an attorney representing any Respondent. . . ." The intent of the Project Coordinator and CCP is to streamline communication. However, without a comprehensive CCP and communication continuing outside of the Project Coordinator, DTSC has been forced to continue to coordinate Site issues with multiple attorneys and consultants, which has resulted in increased oversight costs.

Accordingly, Respondents shall submit a separate, stand-alone CCP, for DTSC approval by February 24, 2017. The CCP shall specify "the requirements and procedures by which Respondents will communicate and coordinate with one another in carrying out the requirements" of the Consent Agreement. This includes identification of key personnel, roles and responsibilities for the Site, and lines of communication. This information can be presented in an organization chart or a similar format, with explanatory text. The CCP is considered a "living document" and should be updated as conditions change or needs arise. At this point, the CCP shall address contact persons, communication chain, document submittal and review interface between parties on issues such as:

1. Project Coordinator role and responsibilities consistent with Section 6.1 of the Consent Agreement.
2. Preparation of the Preliminary Endangerment Assessment Work Plan and Report.
3. Implementation of field work for the PEA.

4. Coordination of release of Site information to the media and public, including posting of information on respective websites.
5. Coordination with South Coast Air Quality Management District on compliance issues and review of documents.
6. Coordination for media and public inquiries.
7. Coordination on invoice disputes, if any.
8. Based on recent coordination issues, Respondents may consider using a separate point of contact for activities and communication related to the Order to Fence and Post, such as:
 - a. Notification and response to issues regarding plastic sheeting, fencing, and signs. Contractor may be contacted by DTSC or by the public, as directed on site signs.
 - b. Site visits that shall be conducted as requested by DTSC, in response to public inquiries. Site visits shall be conducted at a minimum frequency of two times per week, until modified by DTSC.
 - c. Documentation for site visits shall be submitted to DTSC by the following day.
 - d. Documentation for each site visit shall identify the site and personnel conducting the site visit, summary of activities, and photographs with description, location, date, and time. In addition to photos to demonstrate compliance or verify repair, include a photograph of the overall site, showing the bottom slope, stockpiled soil area, and top slope (possibly from along Main Sail Drive, south of the site, facing northeast).
 - e. DTSC shall be notified of site activities.

If you have any questions, please feel free to contact Triss Chesney, Project Manager, at (714) 484-5447 or Triss.Chesney@dtsc.ca.gov.

Sincerely,

Peter A. Garcia

REVIEW OF DRAFT PRELIMINARY ENDANGERMENT ASSESSMENT WORK PLAN,
LADERA LINDA SITE, STOCKPILED SOIL AREA LOCATED ADJACENT TO UPPER
LADERA FIELD, 32201 FORRESTAL DRIVE, RANCHO PALOS VERDES
(SITE CODE: 401759-00)

Dear Mr. Miller:

The Department of Toxic Substances Control (DTSC) reviewed the Draft Preliminary Endangerment Assessment (PEA) Work Plan and associated Health and Safety Plan, prepared by Avocet Environmental, Inc., dated December 29, 2016. The documents describe investigation activities proposed for a stockpiled soil area located adjacent to and north of Upper Ladera Field at 32201 Forrestal Drive in Rancho Palos Verdes (Site).

The PEA Work Plan and associated Health and Safety Plan were submitted in response to DTSC's November 18, 2016, letter requiring additional investigation, in the form of a PEA, to determine whether a release or threatened release of a hazardous substance exists at the Site that poses a threat to public health or the environment. The PEA is required pursuant to Section 5.1.3 of the Consent Agreement (Docket No. HSA-FY 16/17-037) which states that the PEA shall be conducted in accordance with the DTSC PEA Guidance Manual¹.

The PEA Work Plan is severely deficient, does not follow the DTSC PEA Guidance Manual, and does not comply with the Consent Agreement for the Site. For clarification, the PEA is a standard DTSC process used for any site to determine if there has been a release of a hazardous substance that presents a risk to human health or the environment. The DTSC PEA Guidance Manual describes technically defensible and consistent approaches for performing a PEA.

¹ "Preliminary Endangerment Assessment Guidance Manual," State of California, Environmental Protection Agency, Department of Toxic Substances Control, revised October 2015 (https://www.dtsc.ca.gov/PublicationsForms/upload/PEA_Guidance_Manual.pdf).

As a reminder, the following conditions apply to the Site:

1. Respondents are subject to a Consent Agreement.
2. DTSC required a PEA under the Consent Agreement.
3. The Consent Agreement requires that a PEA be conducted in accordance with the DTSC "Preliminary Endangerment Assessment Guidance Manual."

Based on review of the PEA Work Plan, DTSC would like to clarify that the PEA Work Plan is a technical document that should present an objective, step-wise approach, with findings based on research or data. This includes an objective evaluation of background research and previous investigations to identify recognized environmental conditions. Then, site characteristics, affected media, contaminant concentrations, contaminant fate and transport, and potential receptors are used to develop a strategy to address recognized environmental concerns. The data quality objective (DQO) process is used to establish performance and acceptance criteria, which serve as the basis for designing a plan for collecting reliable data of sufficient quality and quantity to support the goals of the study. A sampling and analysis plan documents the procedural and analytical requirements for collection of samples to ensure that the DQOs are met. Much of this information is missing and as a result, the draft PEA Work Plan does not provide sufficient detail to support the proposed investigation.

In an effort to help move the project forward, DTSC has spent a considerable amount of time to review the document and provide constructive comments. Comments on the documents from DTSC and South Coast Air Quality Management District are enclosed.

DTSC requires you to revise the document in accordance with the enclosed comments and submit a draft final PEA Work Plan by March 10, 2017, for DTSC review and approval.

If you have any questions, please feel free to contact Triss Chesney, Project Manager, at (714) 484-5447 or Triss.Chesney@dtsc.ca.gov.

Sincerely,

Yolanda M. Garza
Unit Chief

**DTSC COMMENTS
DRAFT
PRELIMINARY ENDANGERMENT ASSESSMENT WORK PLAN
LADERA LINDA SITE
RANCHO PALOS VERDES
(SITE CODE 401759-00)**

DTSC staff reviewed the Draft Preliminary Environmental Assessment (PEA) Work Plan. Comments from the DTSC Project Manager, Toxicologist, and Industrial Hygienist are provided below. Original memoranda from the Toxicologist (DTSC Human and Ecological Risk Office) and Industrial Hygienist (DTSC Health and Safety Program) are available for review in DTSC project files. All questions regarding these comments should be directed to the Project Manager.

Triss M. Chesney, P.E.

Project Manager

Triss.Chesney@dtsc.ca.gov

GENERAL COMMENTS

1. In accordance with Section 5.1.3 of the Consent Agreement, the Preliminary Endangerment Assessment (PEA) shall be conducted in accordance with the DTSC "Preliminary Endangerment Assessment Guidance Manual," revised October 2015. The draft PEA Work Plan is missing many critical components that are addressed in the list of specific comments provided below. Additionally, the PEA Work Plan is intended to be a technical document that presents an objective evaluation of background research and data that is used to support the investigation strategy. After the comments are addressed and incorporated, the PEA Work Plan should be checked to ensure consistency with the PEA Guidance Manual and presentation of unbiased, objective evaluations, prior to resubmitting to DTSC.
2. The following designations are used, in the comments, to describe the stockpiled soil on the Site:
 - a. Imported stockpiled soil, reportedly imported from a residential property in Torrance.
 - b. Underlying stockpiled soil from Ocean Field.
3. Background Comparison of Asbestos: The PEA Work Plan proposes using background level of asbestos to determine if the imported (Torrance) soil poses any risk to human health or the environment. Using the background level implies that naturally occurring asbestos (NOA) is present at or near the Site. The PEA Work Plan should first demonstrate that there are NOA minerals in the Site vicinity. Based on DTSC review of geologic maps for the area, it is not likely that NOA would be found at the Site. As a result, comparison to background is not appropriate unless it can be demonstrated that NOA is present. A qualified

professional (e.g. Registered Geologist) should determine if geologic units that could potentially contain NOA are present at the Site.

4. Off-Site Disposal: The PEA Work Plan proposes off-site disposal of imported (Torrance) soil if asbestos is present. Off-site disposal is a response action that should be evaluated and described in Removal Action Work Plan or Remedial Action Plan. DTSC cannot approve a mitigation measure in a PEA Work Plan. As a result, all text related to off-site disposal should be revised to clarify that response actions will be evaluated in either a Removal Action Work Plan or Remedial Action Plan.
5. Site Runoff: Verify that trenching activities are not subject to requirements under the State Water Resources Control Board's Construction Storm Water Program. If not, include a description of contingency procedures that will be used to prevent runoff from transporting soil off site in the event of rainfall.

SPECIFIC COMMENTS

1. Section 1.0 – INTRODUCTION:
 - a. Consistent with Section 5.1.3, add the statement, "The purpose of the PEA is to determine whether a release or threatened release of a hazardous substance exists at the Site that poses a threat to human health or the environment."
 - b. Add specific objectives consistent with the following:
 - i. Determine if asbestos-containing material is distributed throughout the imported soil.
 - ii. Determine if asbestos has been released to soil by using a more sensitive analytical method that provides a stronger line of evidence for absence of fibers in soil.
 - iii. Determine if asbestos has impacted the underlying stockpiled material that originated from nearby Ocean Field.
 - iv. Determine if asbestos has been carried by stormwater runoff and deposited at the bottom of stockpiled soil.
 - v. Determine if an action is required to reduce an existing or potential threat to public health or the environment.
 - c. Also include a brief description of the scope of work proposed to meet the objectives.
 - d. Include names and contact information for personnel.
2. Section 2.1 – Site Location:
 - a. Rename this section "Site Description and Location."
 - b. State the Site name, "Ladera Linda Site," DTSC Site Code 401759-00, address, size, and assessor's parcel number(s).
 - c. Add the following information, consistent with the October 2016 DTSC Community Update, to the description of the Site and its location, "The Site is located at the southern corner of the intersection of Forrestal Drive and Main Sail Drive, along a gated section of Forrestal Drive. It is surrounded by the 155-acre Forrestal Nature Preserve with hiking trails

and wildlife. The Site is an undeveloped area containing stockpiled soil, approximately 400-foot by 60-foot, located adjacent to and north of the soccer field known as 'Upper Ladera Field.' The Site is part of Ladera Linda Fields, which is currently owned by PVPUSD and licensed and operated by PV AYSO for its youth soccer program."

- d. Include reference to Figures 1 and 2 for Site Location Map and Site Plan Map, respectively.
 - e. Paragraph 2 states, "Single-family residences (SFRs) are located with approximately 1,000 feet downslope to the southwest." Consistent with the Consent Agreement for the Site, revise this distance to "800 feet."
3. Section 2.0 – BACKGROUND INFORMATION:
- a. Add a section on Regulatory Status to centralize information related to regulatory actions or oversight. Including a summary of actions/oversight and associated date on the following:
 - i. Any South Coast Air Quality Management District notifications or actions.
 - ii. DTSC August 1, 2016 Order to Fence and Post and October 14, 2016 Consent Agreement. Refer to the October 2016 DTSC Community Update for descriptions of each.
 - b. Add a section on Physical and Environmental Characteristics with information on topography, geology and soil types, hydrogeologic setting, depth to groundwater, and climatological setting. Refer to information on geology and hydrogeology provided in "Environmental Summary Report for Assessment of Imported Soil Stockpiled at Ladera Linda, 32201 Forrestal Drive, Rancho Palos Verdes California, DTSC Docket No. HSA-FY 16/17-0037," prepared by Leighton Consulting, Inc., dated November 11, 2016.
 - c. Add a section on Current and Historical Land Uses with information on the current Site status, property owners and operators, business type and years of operation, and site zoning. Refer to background information provided in "Environmental Summary Report for Assessment of Imported Soil Stockpiled at Ladera Linda, 32201 Forrestal Drive, Rancho Palos Verdes California, DTSC Docket No. HSA-FY 16/17-0037," prepared by Leighton Consulting, Inc., dated November 11, 2016.
 - d. Add a section on Surrounding Property Land Uses with a description of surrounding properties and findings from records review, including a regulatory database search and review of maps and photographs. For a review of maps and photographs, refer to the EDR Aerial Photo Decade Package, Historical Topo Map Report, and Certified Sanborn Map Report provided in Appendix G of the "Environmental Summary Report for Assessment of Imported Soil Stockpiled at Ladera Linda, 32201 Forrestal Drive, Rancho Palos Verdes California, DTSC Docket No. HSA-FY 16/17-0037," prepared by Leighton Consulting, Inc., dated November 11, 2016.
 - a. Add a section on Background Research to centralize background research for indications of releases or potential releases of hazardous substances

on the Site or in the vicinity that may affect the Site (refer to the PEA Guidance Manual, pages 12 through 17). The Consent Agreement (Docket No. HSA-FY 16/17-037 is based upon asbestos found in three of fifteen pieces of construction debris collected from the surface of stockpiled soil at the Site. However, the PEA Work Plan needs to clearly demonstrate that there are no additional recognized environmental conditions, beyond asbestos-related issues, that require further investigation. Include a comprehensive list of the information reviewed for background research. Reference can be made to documents submitted as part of the preliminary screening information submitted in accordance with Section 5.1.1. of the Consent Agreement in the following documents:

- i. "Environmental Summary Report for Assessment of Imported Soil Stockpiled at Ladera Linda, 32201 Forrestal Drive, Rancho Palos Verdes California, DTSC Docket No. HSA-FY 16/17-0037," prepared by Leighton Consulting, Inc., on behalf of Palos Verdes Peninsula Unified School District, dated November 11, 2016.
 - ii. "Initial Data Submission pursuant to Paragraph 5.1.1 of the Consent Agreement, Palos Verdes American Youth Soccer Organization, Docket No. HSA-FY 16/17-0037," prepared by Jennifer Taggart on behalf of PV AYSO.
 - b. Conduct a regulatory database search for reported releases or threatened releases for nearby or adjoining properties shall be conducted and included in an appendix to the PEA Work Plan. Record and database searches with their associated distances are listed on page 15 and 16 of the DTSC "Preliminary Endangerment Assessment Guidance Manual," revised October 2015. Include an evaluation of this information in the section on Background Research.
4. Section 2.2 – Stockpile Area History:
- a. This section should include historical information in chronological order.
 - b. Add information on current and historical land uses, including property owners and operators, business type and years of operation, and site zoning.
 - c. If possible, provide an estimate of the time frame (year) that soil was moved from Ocean Field to the Site.
 - d. Refer to background information provided in "Environmental Summary Report for Assessment of Imported Soil Stockpiled at Ladera Linda, 32201 Forrestal Drive, Rancho Palos Verdes California, DTSC Docket No. HSA-FY 16/17-0037," prepared by Leighton Consulting, Inc., dated November 11, 2016.
 - e. Move all information related to investigations to Section 2.3 – Previous Investigations.
5. Section 2.3 – Previous Investigations:
- a. Summaries of previous investigations should be listed in chronological order.

- b. Results of previous investigations should be presented so that data gaps can be clearly identified. In each summary, include the purpose of the investigation, sampling conducted (matrix, location, depth), analytical methods used, analytical results (detected analytes and associated concentrations), and screening levels used to determine if additional evaluation is needed or not. It is helpful to provide the frequency of detection, spatial distribution, range of detected concentrations, and comparison to specific screening values. Provide justification for sampling results that will not need further evaluation with reference to specific screening values. Results of previous investigations can be discussed in text or provided in a table.
 - c. Show sampling locations for previous investigations on a figure.
 - d. Paragraph 2 describes regulatory oversight for the Site. Move this information to the section on Regulatory Status.
 - e. Paragraph 3 describes a systematic inspection and soil matrix sampling conducted by Avocet in September 2016. Clarify that this inspection and investigation was conducted following DTSC's issuance of the Order to Fence and Post on August 1, 2016 and without notifying or receiving approval from DTSC.
6. Add a section for "Recognized environmental conditions." Recognized environmental conditions should directly correlate to results from previous investigations or background research. In addition to asbestos, this section shall list any other recognized environmental conditions identified during evaluation of background research, previous investigations (such as detections of chemical constituents during previous investigations for which justification has not been provided to exclude the detected concentrations), and data gaps from previous investigations. Recognized environmental conditions related to asbestos shall include the following:
- a. Asbestos was found in three of fifteen pieces of construction debris collected for the surface of stockpiled soil at the Site in November 2015.
 - i. It is not known if asbestos-containing material is distributed throughout the imported soil.
 - ii. It is not known if asbestos has been released to soil. During previous investigations, asbestos was not detected in surface soil samples from the stockpiled soil analyzed using polarized light microscopy. However, considering the known presence of asbestos at the Site, DTSC is requiring a more sensitive analytical method, transmission electron microscopy (TEM), to provide a stronger line of evidence for absence of asbestos fibers in soil.
 - iii. It is not known if asbestos has impacted the underlying stockpiled material that originated from nearby Ocean Field.
 - iv. It is not known if asbestos has been carried by stormwater runoff and deposited at the bottom of the slope.
 - v. It is not known if a response action is needed to reduce an existing or potential threat to public health or the environment.

7. Section 2.4 – Current Status and Investigative Approach:
 - a. The information regarding the investigative approach should be moved to the section on Sampling Strategy in Section 3.0.
8. Section 2.5 – Wildlife Habitat
 - a. Clarify whether there are any sensitive species in the vicinity of the Site based on the California Department of Fish and Wildlife's California Natural Diversity Database.
 - b. Paragraph 1 states that if active nests are observed prior to initiating the trench program, an adequate buffer zone will be maintained. The buffer zone should be established by a qualified biologist.
9. Section 3.0 – PROPOSED TEST TRENCHING PROGRAM:
 - a. Add a section for a Conceptual Site Model (CSM) (PEA Guidance Manual, pages 9 through 11) that provides a preliminary understanding of the potential risks to human health and the environment, and to assist in developing the sampling plan. The CSM shall include a receptor network (PEA Guidance Manual, figure 2-1) that identifies primary source (asbestos-containing material), secondary source (affected soil), transport mechanisms (airborne particulate matter and stormwater runoff), exposure medium (soil and air), exposure routes and receptors. The CSM shall also include a figure that combines the information from the receptor network with the physical characteristics of the Site (topography, geology and soil types, hydrogeologic setting, depth to groundwater, and climatological setting). This figure shall show a cross-section of the Site, from Forrestal Drive to the adjacent soccer field, estimated thickness of imported stockpiled soil and estimated thickness of underlying stockpiled soil from Ocean Field.
 - b. Add a section for Data Quality Objectives (DQOs). The DQO process is used to establish performance and acceptance criteria, which serve as the basis for designing a plan for collecting reliable data of sufficient quality and quantity to support the goals of the study.
 - i. Use the DQO process to identify the type, quality, and quantity of data that are needed, and the intended use of the data based on the recognized environmental conditions and CSM. Refer to the United States Environmental Protection Agency "Guidance on Systematic Planning Using the Data Quality Objectives Process, EPA QA/G-4," dated February 2006 (https://www.epa.gov/sites/production/files/documents/guidance_systematic_planning_dqo_process.pdf). The seven-step DQO process includes the following steps:
 1. Step 1 – State the Problem: The purpose of the sampling to program is to determine if the Site is acceptable for unrestricted, residential land use.
 2. Step 2 – Identify the Decision(s) (i.e. Goal of the Study): The data obtained from trenching and sampling activities will be used to evaluate whether releases of hazardous

substances from historical uses have occurred at the Site. Include a list of study questions based on Recognized Environmental Conditions.

3. Step 3 – Identify Inputs to the Decision: Identify information or data that will be used to answer each of the study questions, such as visual observations by a Certified Asbestos Contractor, analytical results of C&D debris, analytical results of soil matrix samples, etc.
 4. Step 4 – Define the Boundaries of the Study: Provide spatial and temporal limits of the study, such as the Site perimeter, depth, estimated time frame, exclusion of inclement weather, etc.
 5. Step 5 – Develop the Decision Rule(s) (i.e. Analytic Approach): Include clear decision criteria used to evaluate decision input, including criteria for visual observations and sample analytical results. Where applicable, criteria should include specific values. Use of subjective terms such as “little,” “isolated,” and “multiple” is not appropriate. Criteria for visual determination of ACM should describe personnel qualifications and associated procedure. These decision rules can be a series of if/then statements to clearly demonstrate decisions proposed for the Site. This process should help focus and clarify decisions included in Figure 4 – Trenching Flow Chart.
 6. Step 6 – Specify Performance or Acceptance Criteria: Describe how data quality indicators, including precision, accuracy, representativeness, comparability, and completeness, will be used to validate data and demonstrate reliability. Identify the data quality indicators, measurement performance criteria, and QC sample and/or activity used to assess the measurement performance for the sampling or analytical procedure. Refer to EPA QA/G-5 Section 2.1.7 and Table 3 for guidance.
 7. Step 7 – Develop the Plan for Obtaining Data: Step 7 refers to development of a sampling strategy based on the DQO process. Step 7 can reference the section where the sampling strategy is described.
- c. Add a section for Sampling Strategy
 - i. Based on the DQOs, the information from Section 2.4 – Current Status and Investigative Approach can be modified and included here. Revise the sampling strategy to incorporate information obtained through the DQO process. This is Step 7 of the DQO process.
 - d. Section 3.0 – Proposed Test Trenching Program
 - i. Reference Figure 3 Proposed Test Trench Locations.

- ii. Explain criteria used to define the approximate extent of April 2015 imported and pre-existing stockpiled material shown on Figure 3.
- e. Section 3.2 Ambient Air Monitoring and Compliance with SCAQMD Rule 1403 – A summary of ambient air monitoring and compliance with SCAQMD Rule 1403 shall be included in the PEA Report, along with associated perimeter air monitoring results and transportation and disposal documentation.
- f. Section 3.3.1 Cover Removal and Stockpile Surface Inspection – inspection is proposed for each trench location. Assuming that one piece of suspect asbestos containing debris is observed for each trench location, there would be a total of 10 pieces of suspected asbestos containing materials. Based on Figure 4, should the mitigation measures be proposed for the Site?
- g. Section 3.3.3 Soil Sampling
 - i. Summarize soil matrix sampling in a table, including sampling location, depth (feet below ground surface), analytical parameter, and rationale for location, depth, and analysis. The rationale should directly correlate to DQOs.
 - ii. DTSC recommends that a minimum of four samples per each trench be collected from the imported stockpiled soil and underlying stockpiled soil from Ocean Field spaced at the same regular interval. Additional biased samples of imported stockpiled soil should be collected based on visual observations with a corresponding biased sample from underlying stockpiled soil from Ocean Field. If asbestos is detected in a biased sample of imported stockpiled soil, the corresponding sample from underlying stockpiled soil from Ocean Field should be analyzed by TEM.
- h. Section 3.3.4 – Asbestos Testing
 - i. Provide documentation that EMSL Analytical, Inc. in South Pasadena is certified by the National Voluntary Laboratory Accreditation Program (NVLAP) and has passed a USEPA audit for environmental asbestos analysis. Only EMSL Analytical, Inc. in San Diego (200855-0) and San Leandro (101048-3) were included in the NVLAP Directory.
 - ii. Data Collection and Evaluation: The laboratory reports will be reviewed for the following:
 - 1. Data completeness
 - 2. Chain-of-custody
 - 3. Holding times
 - 4. Sample preservation
 - 5. Blanks
 - 6. Laboratory control samples
 - 7. Field quality control samples
 - iii. Data that do not meet the DQOs will be qualified. Data qualification flags will indicate whether results are considered anomalous,

estimated, or rejected. Only rejected data are considered unusable for decision-making purposes; however, other qualified data may require further verification, such as reviewing the laboratory's raw data.

- i. Section 3.5 – Waste Profiling (If Required) – DTSC understands the timing and purpose of waste profiling. However, the text shall clarify that soil excavation and off-site disposal is a potential response action that will need to be evaluated in a Removal Action Work Plan or Remedial Action Plan.
10. Add Section 4.0 – Field Operations: Include step-by-step procedures and/or standard operating procedures describing field activities (trenching and C&D debris sampling) and how soil matrix samples will be collected. All equipment used to obtain samples and number and type of field quality controls should be identified. Include the following information in this new section.
- a. Field Equipment: List all field monitoring equipment, sampling equipment, materials, and supplies that will be used for the investigation.
 - b. Utility Clearance: A utility clearance must be conducted prior to trenching or sampling. Delineate investigation or trench locations in white paint. Contact Dig Alert at least two full working days, not including the date of notification, prior to trenching or sampling. Include procedures for marking investigation area or trench locations and notifying Dig Alert (<https://www.digalert.org/home.html>).
 - c. Sample Containers and Preservatives: List in a table or text, analytical methods, types and volume of containers and preservation methods to be used for the different matrices in a table. Describe the type of pre-cleaning method used for the containers or provide a reference.
 - d. Sample Packaging and Shipment: Describe the methods for packaging, labeling, marking and shipping the samples. Discuss field documentation including field logs (log book, drilling logs etc.), photographs, and quality control checklist or logs, and chain of custody forms and seals. The specific types of entries to be made in the various logs should be stated. Provide a description of the sample label with an example. A unique numbering system that positively identifies each sample and does not distinguish the quality assurance and quality control (QA/QC) samples from other samples should be described.
 - e. Field Quality Control: Include detail on collection of field quality control samples. Include field equipment blanks for reusable sampling equipment to evaluate decontamination procedures (one per field decontamination event), homogenized field replicates to evaluate precision (5% of total samples), field blanks (1 per sampling day).
 - f. Sample Custody: Include detail on sample custody, including chain-of-custody.
 - g. Field Measurements: Include detail for equipment calibration and quality control, equipment maintenance and decontamination, and field

- monitoring measurements. Describe or reference (and include in an appendix) calibration procedures to be used for all monitoring equipment.
- h. Decontamination Procedures: All equipment that comes into contact with potentially contaminated soil or water will be decontaminated consistently to assure the quality of samples collected. Disposable equipment intended for one time use will not be decontaminated, but will be packaged for appropriate disposal. Prior to and after each use, reusable sampling equipment or containers will be properly decontaminated. Describe decontamination procedures that will be used for all reusable sampling equipment.
 - i. Investigation Derived Waste Management: Explain how all wastes from the investigation will be managed.
 - i. In the process of collecting environmental samples during onsite soil sampling, potentially contaminated investigation-derived wastes may be generated that include the following:
 - 1. Used personal protective equipment (PPE)
 - 2. Disposable sampling equipment
 - 3. Decontamination fluids
 - 4. Trench material
 - 5. Soil cuttings
 - ii. The USEPA's National Contingency Plan requires that management of investigation-derived wastes generated during such investigations comply with all applicable or relevant and appropriate requirements (ARARs) to the extent practicable. List procedures that will be followed for handling all investigation-derived wastes. Any waste storage containers such as 55-gallon drums will be sealed and labeled (including date) and placed in a secure area of the Site.
 - iii. Information from Section 3.3.5 – Trench Backfill and Cover Restoration can be included in this section as justification for trench material and soil cuttings to remain on site.
 - iv. Decontamination fluids anticipated to be generated during these sampling activities will consist of deionized water, residual contaminants, and water with non-phosphate detergent. The fluids will be poured into 55-gallon drums or portable storage tanks and labeled as "decontamination water." Purged groundwater will be poured into 55-gallon drums or portable storage tanks, labeled with the sample location and date, and sealed.
 - v. Containers filled with PPE/solid waste and decontamination water will be stored onsite in a secure location pending analytical results. After review of the analytical results, and any additional analyses required for waste handling and disposal, the containers will be transported offsite to an appropriate disposal facility.
 - j. Field Variances: If field conditions necessitate deviations from the PEA Work Plan, the DTSC project manager will be notified of proposed

modifications. Approval will be obtained from the DTSC before implementing the modifications. Modifications to the approved Work Plan will be documented in the field logbook and in the PEA Report.

11. Section 3.7 – Reporting

- a. Rename this section, “Section 5.0 – PEA Report Preparation.”
- b. Consistent with the Chapter 3 of the DTSC “Preliminary Endangerment Assessment Guidance Manual,” revised October 2015, a PEA Report that documents the results of the PEA investigation and recommends next steps for the Site shall be prepared.
- c. The PEA Report shall include conclusions to the study questions identified through the DQO process.
- d. The PEA Report will include recommendations based on findings and conclusion of the investigation.

12. Section 4.0 – Communication and Coordination Plan

- a. Rename this section, “Section 6.0 – Public Participation Activities.” The information provided in this section does not meet the requirements for a Communication and Coordination Plan (CCP).
- b. For clarification, DTSC’s November 18, 2016, letter did not request submittal of a “Public Participation Plan in accordance with DTSC’s ‘Public Participation Manual (DTSC, October 2001).’” DTSC requested submittal of a Communication and Coordination Plan in accordance with Section 6.1.1 of the Consent Order. DTSC also approved a subsequent request for an extension to submit the CCP from PV AYSO’s legal counsel.
- c. With the exception of the text under Section 4.1, delete all of the information in this section.
- d. Revise this section to include public participation activities conducted by DTSC for the Site, including the following:
 - i. In October 2016, DTSC released an initial Community Update to announce execution of the Consent Agreement, provide information on Site location and history, list Site contacts, and describe next steps.
 - ii. In January 2017, DTSC completed a Community Profile that describes the Site and associated community, identifies community concerns based on interviews, lists key contacts, and provides recommendations for public participation activities. Include a summary of key information from the Community Update.
- e. Add “Planned Public Participation Activities” to this section, including:
 - i. After DTSC approves the PEA Work Plan, notice shall be provided to residents within a one-mile radius of Site and key contacts (elected officials, local government representatives, media, and other stakeholders) identified for the Site, at least three to five days prior to commencement of work at the Site. The notice will be distributed and posted, as follows:
 1. DTSC will distribute the Work Notice directly to residents and key contacts by mail, email, or hand delivery.

2. DTSC will forward an electronic copy of the Work Notice to the Project Coordinator, to print and post around the perimeter of the Site. The Project Coordinator shall forward photographs to DTSC as proof of posting at the Site.
- ii. Based upon community interest, DTSC has determined that the PEA Report shall be made available to the public to review and comment for a period of 30 days, prior to DTSC approval.
 1. Respondents shall document investigation activities, findings, and conclusions, in a PEA Report and submit it for DTSC review. The PEA Report shall be prepared in accordance with the DTSC PEA Guidance Manual.
 2. DTSC will review the draft PEA Report either provide comments on the report for revision, request additional site assessment, or determine that the report is adequate for public review.
 3. If revisions are required, the Respondents shall complete the revisions and resubmit the PEA Report for DTSC review.
 4. If DTSC determines that the report is adequate for public review, the PEA Report will be made available to the public to review and submit comments for a period of 30 days. As directed by DTSC, Respondents shall coordinate preparation, publishing, and posting of a public notice that encourages public participation during the comment period. DTSC retains the right to implement any of these activities independently.
 5. DTSC will consider public comments received on the PEA Report, and request revisions to the document, as necessary.
 6. Respondents shall submit the final PEA Report, or change-out pages to DTSC.
 7. DTSC shall issue a determination of "no further action" or "further action required".

13. Section 5.0 – Anticipated Schedule

- a. Provide a schedule with sufficient detail of activities (start/end/duration) to demonstrate sequencing of activities and allow DTSC to determine when to schedule site visits to observe critical activities. Activities should include, but are not limited to, the following:
 - i. Notification of SCAQMD at least ten days prior to commencement of trenching activities.
 - ii. Distribution and posting of field work notice (three to five days prior to commencement of work at the Site)
 - iii. Marking of investigation area or trenching locations
 - iv. Notification of Dig Alert
 - v. Mobilization of Field Personnel
 - vi. Stockpile Surface Inspection

- vii. Inspection Reporting
 - viii. Trench Excavation/Soil Sampling/Trench Backfill and Cover Restoration
 - ix. Sample analysis
 - x. Reporting schedule
 - xi. PEA Report Submittal
14. Figure 1 – Site Location Map, Figure 2 – Site and Vicinity, and Figure 3 – Proposed Test Trench Locations
- a. Revise site boundary to be consistent with Exhibit A in the Consent Agreement (Docket No. HSA-FY 16/17-037).
 - b. Include a legend for the site boundary.
15. Figure 4 – Trenching Flow Chart: Revise figure to reflect sampling strategy developed using the DQO process.

Vivek C. Mathrani, PhD, DABT
Staff Toxicologist
Human and Ecological Risk Office
Department of Toxic Substances Control
700 Heinz Avenue
Berkeley, California 94710
(510) 540-3737
Vivek.Mathrani@dtsc.ca.gov

SCOPE OF REVIEW

The Human and Ecological Risk Office (HERO) reviewed the document for scientific content relevant to human and environmental risk assessment. Inadequacies relevant to risk assessment are noted below.

COMMENTS

1. Section 3.3, Excavation and Soil Sampling: HERO finds the comparison of sample trench densities for homogeneous borrow material and the subject stockpile inappropriate. For a “homogeneous” distribution of asbestos in soil, a lower sampling density is driven by a lower expected variability in sampling results. However, the need for a higher sampling density in the subject pile is driven by scattered sources (i.e. asbestos containing material in construction/demolition debris) manifesting potentially high variability in the distribution of asbestos. Comparison to DTSC’s 2004 Interim Guidance on evaluation of homogeneous borrow material for naturally occurring asbestos does not provide a sound basis for calling the proposed sampling plan “conservative in the extreme,” and therefore the statement should be removed. Rather, the proposed sampling plan should offer high confidence in identifying and delineating asbestos in soil given its potentially high variability in distribution.

DOCUMENT REVIEWED

The HSP has reviewed "Health and Safety Plan, Environmental Services, Stockpiled Soil Area Adjacent to Upper Ladera Field, 32201 Forrestal Drive, Rancho Palos Verdes, California, (DTSC Site Code 401759-00), December 29, 2016," (HASP) and the "Work Plan For Preliminary Endangerment Assessment (PEA), Stockpiled Soil Area Adjacent to Upper Ladera Field, 32201 Forrestal Drive, Rancho Palos Verdes, California, (DTSC Site Code 401759-00), December 29, 2016."

GENERAL COMMENTS

1. The HASP is required to be a stand-alone document. The minimum required information necessary to ensure the health and safety of personnel on the "Site" must be contained within the HASP. The HASP may refer to other documents for community safety and health information, such as an air monitoring plan, which is often located in the work plan for a Site.
2. The Department of Toxic Substances Control (DTSC) has reviewed the HASP for conformance with Title 8, California Code of Regulations (T8 CCR), section 5192: "Health and Safety for Hazardous Waste Operations and Emergency Response"; and TB CCR, subchapter 4 "Construction Safety Orders." The requirements of 40 CFR, T22 CCR, the California Health and Safety Code, as well as DTSC Policies and Procedures may also be considered in the DTSC review. Some of the general areas of concern include field safety issues such as electrical hazards (including overhead and buried electrical lines); confined spaces; excavations; controlling hazards through engineering, administrative, work practice controls and personal protective equipment; slip trip and fall hazards; lighting issues; heavy equipment safety; heat and cold stress; noise; radiation; and chemical hazards. Please note that in addition to the requirements of these citations, the employer is responsible for the implementation of an effective Injury and Illness Prevention Program which is required by TB CCR, sections 1509 and 3203. The requirements of those sections have not been included in this review.
3. The HASP should apply to all contractors, sub-contractors, and regulatory personnel on-site. In the event that the HASP does not cover a contractor or sub-contractor, they must submit their own HASP to the DTSC for review. If the scope of work changes significantly, (an unanticipated chemical, physical, or biological hazard is discovered or introduced to the Site), then the new hazard

must be addressed in an addendum to the HASP and submitted to the DTSC for review.

4. The DTSC review of the HASP does not constitute a guarantee that all potential hazards have been anticipated, recognized, and addressed, or that the HASP will be properly and safely implemented. The DTSC is unable to foresee every health and safety hazard in the work-place by reviewing the HASP. Effective implementation and regulatory compliance are the employer's responsibilities. Continuous surveillance of the Site and creation of an effective health and safety program by the employer will reduce work place injuries and liability.
5. The HASP was reviewed for scientific content. Minor grammatical or typographical errors that do not affect interpretation have not been noted; however, these errors, if any, should be corrected in future versions of the document.
6. An industrial hygienist from the DTSC may perform a field audit in order to confirm the implementation of the provisions and specifications presented in the HASP. The DTSC review of the HASP and field audit does not guarantee that the HASP will be properly implemented.

SPECIFIC COMMENTS

1. The final site HASP must be available at all times for on-site personnel to reference. In utilizing the site HASP, field staff must be able to obtain sufficient information to compile an accurate assessment of the site safety issues associated with every job function.
2. The HASP appears to be lacking and/or has incomplete key elements. The following is a brief summary of HSP's HASP expectations:
 - a. Air Monitoring: HSP understands that SCAQMD will be reviewing the applicability of SCAQMD Rules 403 and 1403 as it relates to this project.
 - b. Heavy Equipment: Page 17. Section 4.5 Mechanical Hazards. The fourth bullet states "A spotter may be required to work with equipment operators and truck drivers during certain operations." Please either change "may" to "shall" or ensure vehicles are equipped with (1) An automatic back-up audible alarm which would sound immediately on backing, or (2) An automatic braking device at the rear of the vehicle that will apply the service brake immediately on contact with any obstruction to the rear, as specified within 8 CCR 1592.

CONCLUSIONS

The HASP requires additional detail responding to the specific comments outlined above.

South Coast Air Quality Management District

21865 Copley Drive, Diamond Bar, CA 91765-4178

Hazardous Substances Engineer
Department of Toxic Substances Control
5796 Corporate Avenue
Cypress, California 90630

Subject: Stockpiled Soil Area Adjacent to Upper Ladera Field

Dear Ms. Chesney:

Thank you for the opportunity to comment on the Work Plan for Preliminary Endangerment Assessment (PEA) and the associated Health and Safety Plan (HASP) prepared by Avocet Environmental, Inc. for the following project:

Stockpiled Soil Area Adjacent to Upper Ladera Field
32201 Forrestal Drive
Rancho Palos Verdes, California

Based on our review of these documents, South Coast Air Quality Management staff would like to offer the following comments/recommendations:

PV AYSO Work Plan for Preliminary Endangerment Assessment (WPPEA)

Section 1. Introduction

Staff understands that the WPPEA addresses the steps to be taken to assess the conditions of the site, and that the WPPEA is not itself intended as a cleanup plan. The WPPEA makes numerous references to the involvement of a Certified Asbestos Consultant (CAC), as well as a registered professional civil engineer. Staff agrees that the involvement of a CAC is appropriate and necessary to ensure adequate assessment of the site for asbestos contamination.

Section 3.2 Ambient Air Monitoring and Compliance with SCAQMD Rule 1403

Staff appreciates that the WPPEA has been crafted to incorporate Rule 1403 requirements. Although SCAQMD Rule 1403 does not require upwind/ downwind air sampling by the CAC during site assessment excavation activities, this practice is commonly followed by asbestos consultants on larger projects. Staff supports the inclusion of this requirement in the WPPEA, given the location and sensitive nature of the site. Similarly, there are no requirements under Rule 1403 to notify SCAQMD of a consultant's survey or contamination assessment, or to provide SCAQMD with

Cleaning the air that we breathe...

notification ten days in advance of implementing the WPPEA – although the rule does require that SCAQMD be notified under other defined circumstances of renovation or demolition activities. Again, staff appreciates the opportunity to be informed of any and all key activities described in the WPPEA. Because the requirements of SCAQMD Rule 403 Fugitive Dust also apply to the activities on this site, staff recommends that DTSC incorporate these requirements into this section as well.

Section 3.3.1 Cover Removal and Stockpile Surface Inspection

This section specifies that in a “worst case scenario” -- where soil removed during trenching activities is discovered to contain multiple pieces of suspected asbestos-containing construction & demolition debris -- the affected soil will be transported offsite for disposal at a later date.

SCAQMD Rule 1403 addresses the handling, packaging, transporting, labeling and disposing of asbestos containing waste material (ACWM). Specifically:

- Rule 1403(d)(1)(J) requires that ACWM be disposed of at a site identified and operated as a licensed asbestos waste disposal site per Rule 1403(d)(3). The rule also requires that ACWM be packaged in sealed leak-tight containers prior to removal from the site, storage on site, and transport.
- Rule 1403(d)(1)(K) requires that the sealed, leak-tight container be labeled as specified in Rule 1403(d)(3).
- Rule 1403(d)(1)(L) requires that vehicles used to transport ACWM be marked as specified in Rule 1403(d)(3) while loading and unloading.

Staff recommends that DTSC consider adding these requirements to the plan to further safeguard public health, particularly if the suspect soil material will not yet have been determined to contain asbestos prior to transport off site.

Section 3.3.3 Soil Sampling

In the event that volatile organic compounds (VOCs) are encountered in the soil at the site, please note that the excavation of such VOC-contaminated soil is subject to the requirements of SCAQMD Rule 1166 Volatile Organic Compound Emissions from Decontamination of Soil, among which is the requirement to first obtain approval for a Rule 1166 Soil Excavation Plan prior to commencing excavation activities on site.

Section 3.3.4 Asbestos Testing

This section discusses the relative merits of analyzing asbestos samples using Transmission Electron Microscopy (TEM) versus Polarized Light Microscopy (PLM) is discussed. Although Section 1 of 40 CFR Part 763 calls for analyzing samples for asbestos using PLM, EPA allows for the use of TEM, a more precise and expensive method for detecting asbestos. Either method is acceptable to SCAQMD and should be selected at the discretion of the CAC.

PV AYSO Health and Safety Plan (HASP)

Section 1.4 Air Monitoring and Respiratory Protection

SCAQMD agrees that the CAC should have the authority to immediately halt soil disturbance if visible airborne dust is observed. Although airborne asbestos particulates cannot be directly monitored in the field, it is common practice for an onsite CAC or Certified Site Surveillance Technician (CSST) to periodically monitor upwind/downwind air samples using on-site Phase Contrast Microscopy (PCM). While PCM cannot differentiate asbestos fibers from similar fibers, its use may be of interest to the CAC as a screening tool.

Thank you again for considering the comments and recommendations provided above. Please contact me at 909-396-2218 or scaso@aqmd.gov should you have questions or need additional information.

Sincerely,

Montrose Settlements Restoration Program

Palos Verdes Reef Restoration Project: Open House and Seeking Public Comments

The MSRP Trustees are seeking the public's review and comments on the [Draft Environmental Assessment/ CEQA Initial Study and Environmental Checklist for the Palos Verdes Reef Restoration Project](#).

Please join us at our Open House to learn about the details of this newly proposed project.

Palos Verdes Reef Restoration Project Open House

March 2, 2017

6:00-8:00pm

**Point Vicente Interpretive Center
31501 Palos Verdes Drive West
Rancho Palos Verdes, CA 90275**

Through this project, we propose to create 40 acres of new rocky-reef habitat in the Palos Verdes area to restore limited hard substrate habitat. We are proposing to build the reef offshore of Bunker Point within the Palos Verdes Peninsula in the southeastern part of Santa Monica Bay.

The newly created reef will provide habitat for fish, marine algae, and marine invertebrates and create a productive rocky-reef ecosystem in an area with limited reef habitat. Historically, the existing reefs in this area were buried by heavy sedimentation from landslides, irrigation practices, and sewage effluent.

For this project, we plan to place 70,300 tons of quarry rock on 40 acres of sandy ocean bottom within a 69-acre site located 0.3 miles offshore.

The official public comment period for the [Environmental Assessment](#) document begins on **Feb. 21, 2017** and ends on **March 22, 2017**.

About MSRP

The Montrose Settlements Restoration Program is administered by six federal and State of California trustee agencies responsible for restoring natural resources injured by past releases of DDTs and PCBs to the marine environment surrounding the Palos Verdes peninsula.

Re: Vesting Tentative Tract Map 50666

Dear So:

Per your request, we hereby provide an update on the status of Trump National Golf Club Los Angeles' (the "Club") efforts to finalize Tentative Tract Map No. 50666.

On or about July 9, 2014, the Club received Coastal Commission approval of permit amendment A-5-RPV-93-005-21 at a public hearing. The Club is currently in the process of satisfying the special conditions associated with the permit prior to final issuance. In furtherance of these efforts, the Club has submitted the Final Tract Map, the Trail Amenities Plan, and the outfall of Forestall Canyon of MTD 1472-5 to the Coastal Commission to review. Meeting the special conditions in their entirety will require recordation of the Final Tract Map, which will require City action.

In order to compete Vesting Tentative Tract Map 50666, the Club has been working, and continues to work to complete all required steps. Below is a description of the required tasks and the status of each task:

- (1) Recordation of the Final Tract Map: The Final Tract Map has been submitted to the Coastal Commission and is ready to be submitted to the City for plan check.
- (2) Palos Verdes Drive Street Improvement Plans: Ready to be submitted to the City for review.
- (3) Onsite Street Improvement Plans: Ready to be submitted to the City for review.
- (4) Sewer Improvement Plans: Approved by Sanitation District. Currently in direct plan check with the County.
- (5) Storm Drain Improvement Plans: Ready to be submitted to the City.

So Kim
February 15, 2017
Page 2

The public amenities and open space are all dedicate on the Final Map, which as mentioned above, the Club is ready to submit to the City. Once the City agrees to accept the plans for review, we anticipate that approvals will be obtained within 6-8 months.

In summary, we are prepared to move forward once the City agrees to process our application. We hope that the City will now agree to do so.

We hope that this satisfies your request. If you need any additional information, please let us know.

Very truly yours,

Jill A. Martin

DRAFT AGENDA

**RANCHO PALOS VERDES PLANNING COMMISSION
TUESDAY, FEBRUARY 28, 2017
FRED HESSE COMMUNITY PARK, 29301 HAWTHORNE BOULEVARD
REGULAR MEETING
7:00 P.M.**

SCHEDULING NOTES

REQUESTS TO SPEAK ON AN ITEM MUST BE SUBMITTED TO THE COMMUNITY DEVELOPMENT DIRECTOR PRIOR TO THE COMPLETION OF THE REMARKS OF THE FIRST SPEAKER ON THE ITEM. NO REQUEST FORMS WILL BE ACCEPTED AFTER THAT TIME.

PURSUANT TO ADOPTED PLANNING COMMISSION PROCEDURE, UNLESS THE PLANNING COMMISSION AGREES TO SUSPEND ITS RULES, NO NEW BUSINESS WILL BE HEARD AFTER 11:00 P.M. AND NO ITEM WILL BE HEARD PAST MIDNIGHT. ANY ITEMS NOT HEARD BECAUSE OF THE TIME LIMITS WILL BE AUTOMATICALLY CONTINUED TO THE NEXT COMMISSION AGENDA.

NEXT P.C. RESOLUTION NO. 2017-05

CALL TO ORDER:

PLEDGE OF ALLEGIANCE:

ROLL CALL:

APPROVAL OF AGENDA:

COMMUNICATIONS:

City Council Items:

Staff:

Commission:

COMMENTS FROM THE AUDIENCE (regarding non-agenda items):

CONSENT CALENDAR:

1. APPROVAL OF THE FEBRUARY 14, 2017 MINUTES

2. HEIGHT VARIATION/SITE PLAN REVIEW - (CASE NO. ZON2016-00416): 30803 Via La Cresta (ML)

Request: A request to construct a 742 square foot, second-story, addition over an existing garage of an existing two-story residence at an overall proposed structure height of 25.65', as measured from the point where the lowest foundation or slab meets finished grade (98.61') to the highest roof ridgeline (124.26').

Action Deadline: February 20, 2017

Recommendation: Adopt P.C. Resolution No. 2017-__, thereby approving a Height Variation for the construction of a 742 square foot second-story addition over an existing garage of a two-story residence.

CONTINUED PUBLIC HEARINGS:

3. APPEAL OF SITE PLAN REVIEW – (CASE NO. ZON2016-00332): 27501 Western Avenue (SK)

Request: Overturn the Director's approval of a Site Plan Review for the construction of a combination wall up to 14.9' in height to accommodate an additional burial area and niches in the eastern edge of Vista Del Ponte; a water feature; a stairway that will provide access to the upper existing burial area at Vista Del Ponte and the upper area of Inspiration Slope; and 793yd³ of grading to support the proposed improvements.

Action Deadline: None

Recommendation: Continue the public hearing to March 28, 2017 at the request of the applicant.

CONTINUED BUSINESS:

NONE

NEW PUBLIC HEARINGS:

4. COASTAL PERMIT, GRADING PERMIT, AND VARIANCE – CASE NO. ZON2016-00125: 104 Spindrift Lane (AS)

Request: Demolish an existing residence and construct a new 2,572ft² split-level residence (2,170ft² residence and 402ft² garage) and a 171ft² balcony at 23' in height with reduced front and rear yard setbacks, and to conduct 50yd³ of grading balanced on site with retaining walls to accommodate the improvements.

Action Deadline: March 31, 2017

Recommendation: Adopt P.C. RESOLUTION No. 2017-___; thereby conditionally approving a Coastal Permit, Grading Permit and Variance to demolish an existing residence and to construct a new 2,572ft² split-level residence (2,170ft² residence and 402ft² garage) and a 171ft² balcony at 23' in height with reduced front and rear yard setbacks, and to conduct 50yd³ of grading balanced on site with retaining walls to accommodate the improvements.

5. COMPLIANCE REVIEW NO. 4 OF THE POINT VIEW MASTER USE PLAN CONDITIONAL USE PERMIT – (CASE NO. ZON2010-00087): 6001 Palos Verdes Drive South. (LM)

Request: Conduct the fourth review of the project's compliance with, and adequacy of, the Conditions of Approval imposed by the Planning Commission for the Point View Master Use Plan.

Action Deadline: None

Recommendation: Review Staff's analysis and determinations regarding Compliance Review No. 4 of the Point View Master Use Plan Conditional Use Permit, and if acceptable, adopt P.C. Resolution No. 2017-___ thereby amending Condition Nos. 64, 70 and 72, and adding Condition No. 6.c to address Staff's concerns pertaining to noise and operational impacts.

6. SITE PLAN REVIEW, MINOR GRADING PERMIT AND ENVIRONMENTAL ASSESSMENT/MITIGATED NEGATIVE DECLARATION – (CASE NO. ZON2016-00401): 48 Cinnamon Lane (SK)

Request: Construct a 1,917ft² manufactured single-family residence and a 600ft² detached garage, install a water storage tank, and conduct 50yd³ of grading to accommodate the proposed improvements.

Action Deadline: July 29, 2017

Recommendation: 1) Adopt P.C. Resolution No. 2017-___, thereby certifying a Mitigated Negative Declaration for the proposed project; 2) Adopt P.C. Resolution No. 2017-___, thereby approving a Site Plan Review and Minor Grading Permit for the placement of a new manufactured residence, detached garage, water storage tank, and 50yd³ of grading to accommodate the proposed improvements.

NEW BUSINESS:

NONE

ITEMS TO BE PLACED ON FUTURE AGENDAS:

7. PRE-AGENDA FOR THE MEETING ON MARCH 14, 2017

ADJOURNMENT:

Americans with Disabilities Act: *In compliance with the Americans with Disabilities Act of 1990, if you require a disability-related modification or accommodation to attend or participate in this meeting, including auxiliary aids or services, please call the Community Development Director at 310 544-5228 at least 48 hours prior to the meeting.*

Notes:

1. Staff reports are available for inspection at City Hall, 30940 Hawthorne Boulevard during regular business hours, 7:30 A.M. to 5:30 P.M. Monday – Thursday and 7:30 A.M. to 4:30 P.M. on Friday. The agenda and staff reports can also be viewed at Fred Hesse Community Park, 29301 Hawthorne Boulevard during the Planning Commission meeting.
2. Materials related to an item on this Agenda submitted to the Planning Commission after distribution of the agenda packet are available for public inspection at the front counter of the Planning Division lobby at City Hall, which is located at 30940 Hawthorne Boulevard, Rancho Palos Verdes during normal business hours as stated in the paragraph above.
3. You can also view the agenda and staff reports at the City's website www.rpvca.gov.
4. Written materials, including emails, submitted to the City are public records and may be posted on the City's website. In addition, City meetings may be televised and may be accessed through the City's website. Accordingly, you may wish to omit personal information from your oral presentation or written materials as they may become part of the public record regarding an agenda item.
