APPLICANT: **Ben Cauthen, Cauthen Design Inc.**

The Height Variation procedure is for the construction of additions to existing residential structures that are proposed to be taller than sixteen (16') feet in height, but not to exceed a maximum height of twenty-six (26') feet. In reviewing a Height Variation application, the City will assess the impacts of the structure above 16 feet in height on the views from neighboring properties and from public areas, its cumulative impact on the effected properties, and compatibility of the proposed structure with existing surrounding uses. When reviewing a project's "Neighborhood Compatibility," the City will review the proposed project relative to the following criteria for the immediate neighborhood: 1) scale of surrounding residences; 2) architectural style and materials; and 3) front, side, and rear yard setbacks.

The reason you are receiving this notice is because your property is located within 500' of the proposed project. A temporary frame structure (silhouette) has been constructed on the project site outlining the height and bulk of the proposed project. This frame will be in place throughout the duration of the public comment period to better assist you and the City in assessing any potential project impacts.
