

Sandbags

If you need sandbags to protect your property against runoff during rainy season, please come to RPV City Yard/City Hall at 30940 Hawthorne Blvd. Sandbags are located at the City yard and there is a limit of 10 sandbags per household. If you need additional bags, a good idea may be to contact your local hardware store to have additional sand and bags delivered to your home ahead of the onset of the rainy season.

Sewer Spills or Sewer Overflows

If you see water coming out of a manhole cover, smell a foul odor (similar to rotten eggs), or see large amounts of water pooling with a foul odor, this might be a sewer overflow. Immediately do the following:

1. During business hours, call RPV Public Works at 310-544-5252, Mondays to Thursdays from 7:30 am– 5:30 pm, and Fridays 7:30 am – 4:30 pm.
2. Afterhours or weekends, call L.A. County Public Works at 800-675-4357, and/or the County Sanitations District at 562-437-6520. They handle both sewer and storm drain issues.

Maintenance of Sewer Lines

It is important to keep your sewer lines clear. The Los Angeles County Department of Public Works has a helpful information flier/guide for your use. Reading it could help you minimize sewer back-ups. It explains the private property owner's areas of responsibility and the County's areas of responsibility.
