

Powering Off for Wildfire Safety

When there are potentially dangerous weather conditions in fire-prone areas, SCE may need to call a **Public Safety Power Shutoff (PSPS)** event. During these events, SCE will proactively turn off power in high fire risk areas to reduce the threat of wildfires. Turning off our customers' power is not something SCE takes lightly, but PSPS events are one of the ways we can better ensure the safety of the public, our customers, and our employees.

Click on the following link for more information about the SCE PSPS page that shows the current status of PSPS activities (including areas under consideration), as well as other information about PSPS: <https://www.sce.com/safety/wildfire/pmps>

SCE really encourages residents to sign up for our Outage Notifications and get notified about PSPS events and other outages by clicking on the following link:
