What is a cooling center?

Cooling centers are designed to provide relief and protection during extreme heat. During extreme heat events, the City will provide free, indoor, air-conditioned locations where you can cool down, especially if you do not have access to air conditioning, are older, have very young children, or have certain health conditions

When are Cooling Centers open?

The City Manager or their designee may open cooling centers when the temperature is forecast to exceed 85 degrees for a period of 24 hours or more, when the temperature exceeds 85 degrees and the City experiences a power outage, or when a heat warning, excessive heat advisory, or excessive heat watch is issued.
