

## Residential Electric Vehicle Charger Checklist

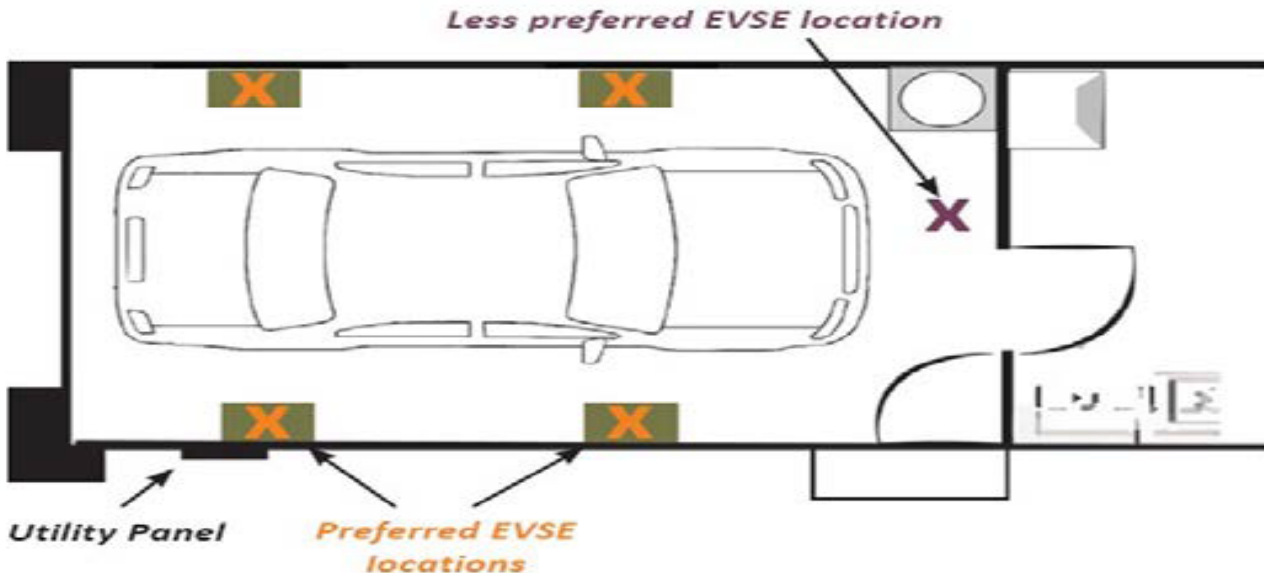

To assist in expediting your Residential Electric Vehicle Charger (REVC) installation permit, please identify the type of REVC being installed:

Type of REVC	Power Levels – Volt Alternating Current (VAC)	Check One
Level 1	110/120 VAC at 15 or 20 Amps	
Level 2 (3.3 KW) – Low	208/240 VAC at 20 or 30 Amps	
Level 2 (6.6 KW) – Medium	208/240 VAC at 40 Amps	

and answer the following questions:

A.	Do you have a site plan?	Y	N
B.	Will the charger be installed according to the indoor/outdoor installation requirements per the manufacturer's guidelines?	Y	N
C.	Is the electrical panel location and amperage indicated on the site plan?	Y	N
D.	Is an extra breaker slot available on the electrical panel to accommodate the REVC?	Y	N
E.	Does the electrical panel need to be upgraded?	Y	N
F.	Does the REVC Equipment have a Nationally Recognized Testing Laboratory (NRTL) approved listing mark?	Y	N

**Circle the Approximate Location of Charging System (EV Chargers located on the outside of the house or garage requires Planning Approval. Contact them at 310-544-5287 or email at [planning@rpvca.gov](mailto:planning@rpvca.gov) )**

(I/We) the undersigned declare, under penalty of perjury under the laws of the State of California, that the information on all plans, drawings, and sketches attached hereto and all the statements and answers contained herein are, in all respects, true and correct.
