

# ALTERNATIVES FOR NATURAL GAS SERVICE

Recent developments in the Portuguese Bend Landslide Complex have resulted in the discontinuation of natural gas service to some homes in the area. This informational handout outlines alternatives for natural gas service to continue serving key home appliances and equipment including, but not limited to, stoves, furnaces and water heaters. Please note that these alternatives should be considered as temporary alternatives. This handout also identifies the City of Rancho Palos Verdes permitting requirements for the consideration of an alternative fuel service.

For questions and additional assistance, please contact the City's Building & Safety Division at **(310) 544-5280** or **BuildingSafety@rpvca.gov**. Appointments are strongly encouraged. Please note that the typical planning review process is being bypassed at this time.

## Alternative No. 1: **SWITCHING FUEL SOURCE TO PROPANE GAS**

Switching a fuel source to propane gas involves the installation of a gas tank and supporting improvements. Natural gas appliances must be fitted with conversions kits, which may require replacement of burners, regulators, and gas lines for the house to make it propane gas compatible.

This alternative is not as simple as disconnecting an existing gas hose and reconnecting to a propane tank that is used for an outdoor grill — SoCalGas advises doing so is unsafe. This alternative requires professional installation, as it can be dangerous if the person doing the work does not have the technical experience and required licensing. Please consult with a licensed professional who specializes in propane gas installations to consider factors such as, but not limited to:

- Adequate sizing and placement of proposed tank;
- Availability of conversion kits for existing appliances; and
- Project timing and installation costs.

Permits and inspections are required to switch a fuel source to propane gas. Permit fees are currently being waived for homes impacted by the discontinuation of natural gas service. Permit submittal requirements include, but are not limited to:

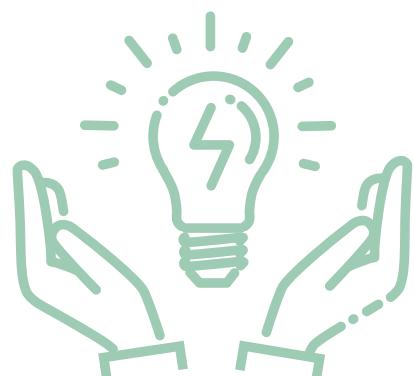

- A sketch of the project site plan detailing location of property lines, existing structures and proposed improvements.
- Specification Sheet for the model of propane tank that is proposed to be used and connection requirements
- Submittal of completed Building Permit Application (PDF) to the Building & Safety Division (Attached)

Inspections require a gas pressure test to be conducted to ensure there are no leaks. At the same time, the City's Building Inspector will view the provided specification sheet(s) for the conversion kits and ensure the propane tank matches the proposed model from the permit application.

## Alternative No. 2: **SWITCHING FUEL SOURCE TO ELECTRIC**

Essential appliances can be replaced with their electrical counterparts including electric furnaces and water heaters. Switching to electric appliances and equipment may require the installation of a new electrical circuit to adequately service new equipment. A licensed electrician is required for the installation of new electrical equipment including panel upgrades.

Permits and inspections are required to switch for all electrical improvements. Submittal of a completed Building Permit Application to the Building & Safety Division is required for processing.

# Building & Safety Permit Application

SINGLE-FAMILY/DUPLEX

MULTI-FAMILY

COMMERCIAL

RANCHO PALOS VERDES

Staff will assign **PERMIT NO.**

**For Simple Online  
Permit Reviews go  
to [www.rpvca.gov/](http://www.rpvca.gov/)**

**THE APPLICANT MAY BE:**

1. A Licensed Contractor
2. An Owner-Builder (all property owners who apply are "Owner-Builders")
3. An Agent acting for the contractor or owner-builder. With letter of authorization.

**NOTE TO OWNER-BUILDERS**

In compliance with state law, the City of RPV will provide you with a notice and the [Owner's Acknowledgment and Verification of Information Form](#) that explains the legal implications of construction on your property. You will need to sign and submit this acknowledgement prior to permit issuance.

**NOTE TO CONTRACTORS**

Complete this permit application before getting counter service. To verify license information, visit: Contractor's State License Board website: <https://www.cslb.ca.gov/>
